

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER NO. 81-26

AN ORDER AMENDING ORDER NO. 78-11 FOR:

CITY OF MOUNTAIN VIEW
SHORELINE REGIONAL PARK
CLASS II-2 SOLID WASTE DISPOSAL SITE
SANTA CLARA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region, (hereinafter called the Board) finds that:

1. This Board adopted Order No. 78-11 on February 21, 1978, prescribing waste discharge requirements for the City of Mountain View (hereinafter called the discharger). Order No. 78-11 contains a requirement that the discharger submit a site closure plan which conforms to the Board's Resolution No. 77-7 (Site Closure Policy).
2. The discharger has submitted a report Shoreline Regional Park - Site Closure Plan, dated January 30, 1979 and a supplement to the report on site grading, dated March 10, 1981. These reports conform to Resolution No. 77-7, with the exception that in certain areas of the site the final slope will be two percent rather than three percent.
3. Finding 2 above can be mitigated with the installation of surface and subsurface drainage collection and transport systems.
4. The site stopped accepting wastes in the 544-acre parcel (hereinafter referred to as Parcel I) in May 1980. Wastes are currently being disposed of in the remaining 150-acre parcel (hereinafter referred to as Parcel II) - which has a projected life to the year 2013. The entire 694-acre site is gradually being converted into a shoreline Regional Park. Approximately 60 percent of the land-fill area within Parcel I will be used for a golf course - expected to be ready for use by the summer of 1982.
5. The Board has notified the discharger and interested agencies and persons of its intent to amend waste discharge requirements for the discharge and has provided them with an opportunity for a public hearing and an opportunity to submit their written views and recommendations.
6. The Board, in a public meeting, heard and considered all comments pertaining to the discharge.
7. This project involves the continued operation of a publicly owned Class II-2 facility with minor alteration to the land. Consequently, this project will not have a significant effect on the environment based upon the exemption provided in Section 15101, Title 14, California Administrative Code.

IT IS HEREBY ORDERED that the discharger shall comply with the following at the Shoreline Regional Park Solid Waste Disposal Site:

A. Order No. 78-11 is amended to add the following as Section D.

"D. Site Closure Specifications

1. This site shall continue to be operated and its closure completed in compliance with this Board's Resolution No. 77-7 and in accordance with the report, Shoreline Regional Park - Site Closure Plan, dated January 30, 1979 and a supplement dated March 10, 1981.
2. Slopes shall be at least three percent, except where incompatible with park use (i.e. golf course fairways), in which case grades shall be not less than two percent and mitigated by installation of adequate water collection and drainage systems as described in the closure plan supplement of March 10, 1981.
3. Any modification in the method of closure of the landfill from that contained in the closure plan shall be approved by this Board unless the modification provide for direct compliance with the provisions of Resolution 77-7. Such determination of direct compliance shall be made by the Executive Officer."

B. The discharger shall comply with Specifications D.1 and D.2 of Order No. 78-11 as amended by this order according to the following time schedule.

1. Parcel I (544-acres) - Inactive

| <u>Task</u> | <u>Due Date</u> |
|---|--|
| a. Submit a status report and detailed plan and time schedule for compliance | by July 1, 1981 |
| b. Submit status report | by July 1, 1982 and January 1, 1983 |
| c. Achieve full compliance | by July 1, 1983 |
| d. Submit a report prepared by a certified engineering geologist or registered engineer documenting that full compliance has been achieved according to the closure plan specifications | by August 15, 1983 |

2. Parcel II (150 acres) - Active

- a. The discharger shall submit a report annually describing the status of the parcel towards final closure. This report shall be submitted by July 1 of every year. With final report due upon final closure of site.

- b. Within 30 days after the completion of filling of any portions of the disposal areas to final grade, submit documentation signed by a registered civil engineer or a certified engineering geologist that the exterior surfaces of these newly completed portions are covered and graded as described under item D.1 and D.2.

I, Fred H. Dierker, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on May 20, 1981.

FRED H. DIERKER
Executive Officer
